Il marchio della gestione forestale responsabile

The FSC® **forest management standards** include the protection of water quality, prohibit the cutting of ancient forests, prevent the loss of natural forest and prohibit the use of

highly toxic chemicals.

Forest management which respects the environment must ensure that the collection of wood and non-wood forest maintains **biodiversity, productivity and ecological processes**. A socially beneficial forest management helps both the local population and society at large to enjoy long term benefits.

“Economically sustainable” means that forest operations are structured and managed in order to be sufficiently profitable, **without generating financial profit at**

the expenses of the forest resources, the ecosystem or affecting communities.

A great number of consumers, governments and public administrations require FSC® products ; companies that produce certified products have therefore access to larger markets.

FSC® also requires forest managers, on public areas such as on private ones, to engage in decision-making members of local communities and protect the rights of **indigenous people** ensuring that their voice is an integral part of the certification process and the impact of management operations is exceeded.

FSC® is committed, also with the help of certified companies, in order that the world's forests meet the social, ecological and economic needs of current generation **without compromising future ones**.

The FSC® mark can only be used by FSC® printers. For this reason we invite you to check our certificate on WWW.FSC-ITALIA.IT site or online at WWW.FSC.ORG
